EDUCATION

Galgotias College of Engg.

B.Tech Information Technology

11/2021 – 06/2025

EXPERIENCE

Graduate Engineer Trainee — HCLTECH

07/2025 – Present

- Working in the Cloud & AppOps domain with exposure to AWS, primarily supporting database operations through SQL query execution, data retrieval, and reporting using MySQL.
- Hands-on experience with joins, subqueries, aggregations, GROUP BY, indexing basics, and working knowledge of stored procedures, views, triggers, normalization, and core database design concepts.
- Contributed within the COE team at HCLTech to develop an AI agent for database-related tasks, enabling automated SQL query handling, data validation, troubleshooting, and basic query optimization.

PROJECTS

Movie Recommendation System

May-2025

- **Technology Stack:** Python, Pandas, NumPy, Scikit-learn, Vectorization
- Developed a content-based movie recommendation system using collaborative filtering, NLP, and similarity-based ranking.
- Collected and processed datasets from IMDb, TMDb, and Kaggle, including movie titles, cast, genres, tags, ratings, and descriptions.
- Designed algorithms to provide personalized, content-aware recommendations that adapt to growing datasets.
- Optimized data processing and similarity computations for efficient and scalable performance.

AI-Assisted SQL Query Generator

Dec-2024

- **Technology Stack:** Python, API Keys, SQL Database, Google Gemini API
- Developed an AI-powered system that converts natural language text into executable SQL queries, enabling seamless interaction with databases.
- Leveraged Google Gemini API for generative AI capabilities to interpret user intent and generate optimized SQL queries.
- Designed the tool to handle **complex SQL queries** involving joins, aggregations, filtering, and nested sub-queries.

COURSEWORK / SKILLS

- | | | | |
|--------------------------------|-------------------------------------|----------------|--------|
| • Data Structures & Algorithms | • Database Management System (DBMS) | • OOPS Concept | • SDLC |
|--------------------------------|-------------------------------------|----------------|--------|

TECHNICAL SKILLS

Programming Languages: Java, Python

Libraries/Tools: PostgreSQL, Matplotlib, Pandas, Streamlit, Numpy, Scikit-learn

Database: Mysql, Sql

Core Skills: Object-Oriented Programming (OOP), Database Management Systems (DBMS)

CERTIFICATIONS

- Sql Certification - HackerRank
- Crash Course on Python – Coursera
- Data Analytics – Forage
